Corey Matthew Capetillo

Senior Software Engineer

corey.capetillo@gmail.com
+1 (562) 309-5450

Software engineer with 15+ years of end-to-end experience in commerce, billing, shipping, health, support, design, and marketing. First official hire and founding engineer at ReCharge Payments, and senior engineer at Accel Health. I work closely with support, sales, ops, design, and other engineers to build both customer-facing features and team tools.

Technical

TypeScript / JS / Zod	Shopify / Liquid	Shopify API	GitHub / CI / Sentry
React / Vue / Vite	Next.js / Vercel	Stripe API	Docker / Polyrepo / Monorepo
React Query / Redux	MySQL / AWS S3	Claude API	Cypress / Jest / Testing Library
Node / Python	MUI / Chakra	HubSpot API	Figma / Illustrator

Job History

Accel Health — Senior Software Engineer — June 2024 - Present

- Own the front end across the employer app, admin tool, and marketing site.
- Product-manage ambiguous projects, turning vague requests into scoped, shipped features.
- Own features from ideation to delivery, from schema and API design to UI polish.
- Build AI-powered outreach, including an LLM auto-responder with human review.
- Build client-side attribution scripts and serverless HubSpot and Meta integrations.
- Build payer-enrollment and billing tools alongside operations and support teams.
- Own CI/CD, release engineering, E2E testing, and AI-assisted development workflows.

Silo — Senior Frontend Engineer — August 2021 - May 2024

- Built secure vendor portals giving growers access to orders, sales, and payments.
- Designed an expense-distribution engine that allocates costs by unit or pallet.
- Built receiving, fulfillment, and file attachment features for shipping and contractor services.
- Wrote end-to-end, component, and unit tests using Cypress, Jest, and Vitest.
- Shaped API designs with backend as part of a cross-functional product team.

ReCharge Payments — Founding Engineer — November 2015 - April 2021

- Architected customizable widgets to add subscription purchases and storefront integration.
- Used internal APIs to develop customer account dashboards and interfaces.
- Co-architected a template engine, editor, and themes to enable full customization.
- Wrote Python backend services that automate widget installs across every Shopify theme.
- Used Shopify APIs to create automated product installers and cross-department tools.
- Onboarded and trained new engineers; authored public and internal documentation.
- Worked with support leads to improve cross-department processes and automation.

StreetVirus / Epidemic — Senior Web Developer — August 2011 - October 2015

- Worked directly with clients and design to build Shopify, Woo, and Magento themes.
- Designed and developed branded POS (point-of-sale) solutions for pop-up retailers.

DigitalGravel — Website Developer — July 2009 - July 2011

- Designed and developed custom storefronts for eBay's ProStores, Volusion, and NetSuite.

Education

Art Institute of Los Angeles, California — June 2002 - July 2004

Media Arts and Animation, B.S.
